## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 57, 72 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 72 provides for the use of the formulation, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 72 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

The term "small" in claim 58 line 1 is a relative term which renders the claim indefinite. The term "small" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 26-56,58-72 are rejected under 35 U.S.C. 102(b) as being anticipated by Tracy et al (US 5711968; 1/27/98). Tracy teaches a formulation comprising interferon prepared by exposure of the interferon to ethanol (alcohol solvent) under conditions wherein a precipitate or lypophilate is formed. See abstract, column 1 lines 31-33, column 7 lines 10-17, Examples 1,2. Tracy teaches that interferon is released from the formulation over a period of up to about 3-6 months (at least 24 hours). See column 2 lines 27-40. Tracy teaches that the formulation as a medicament to be administered to humans and animals. See column 8 lines 34-41

Claims 26-56,58,59,67-72 are rejected under 35 U.S.C. 102(b) as being anticipated by Violanto et al (US 4826689; 5/2/89). Violanto teaches a formulation comprising steroids or hormones prepared by exposure of the steroids or hormones to isopropanol (alcohol solvent) under conditions wherein a precipitate is formed. See abstract, column 2 line 7, column 3 lines 16-62, column 6 lines 61-68. Violanto teaches that the hormones or steroids are released from the formulation over a period of hours, days, weeks, or months (at least 24 hours). See column 1 lines 32-49. Violanto teaches the formulation as a drug (medicament) to be administered to humans and animals. See column 1 line 64 – column 2 line 16.

### ***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 26-72 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 45-81 of copending Application No. 10193654. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

### ***Election Status***
